

Modelling Non-Compliance with Resource Regulation

Aaron Hatcher

CEMARE, University of Portsmouth, UK

The impact of non-compliance

The impact of non-compliance

- ▶ Harvest rates exceed reported/target levels...

The impact of non-compliance

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing

The impact of non-compliance

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing
 - ▶ total harvest = reported landings + unreported landings + discards

The impact of non-compliance

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing
 - ▶ total harvest = reported landings + unreported landings + discards
- ▶ Implications for biological and economic models...

The impact of non-compliance

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing
 - ▶ total harvest = reported landings + unreported landings + discards
- ▶ Implications for biological and economic models...
 - ▶ catch-effort relationships distorted

The impact of non-compliance

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing
 - ▶ total harvest = reported landings + unreported landings + discards
- ▶ Implications for biological and economic models...
 - ▶ catch-effort relationships distorted
 - ▶ economic performance *underestimated*

The impact of non-compliance

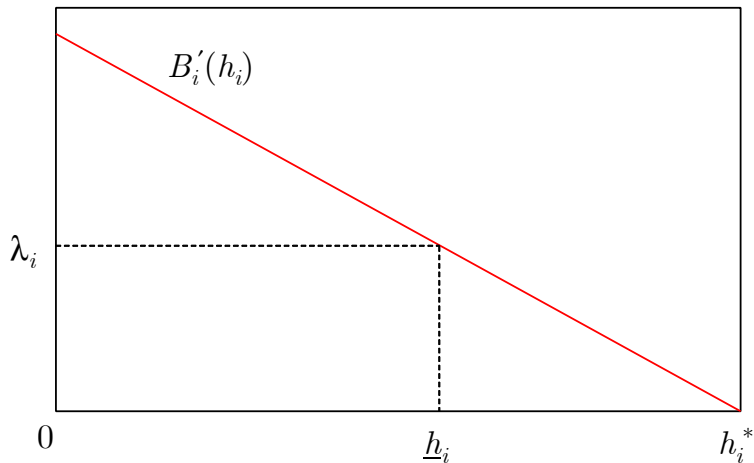

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing
 - ▶ total harvest = reported landings + unreported landings + discards
- ▶ Implications for biological and economic models...
 - ▶ catch-effort relationships distorted
 - ▶ economic performance *underestimated*
- ▶ Link between non-compliance and overcapacity

The impact of non-compliance

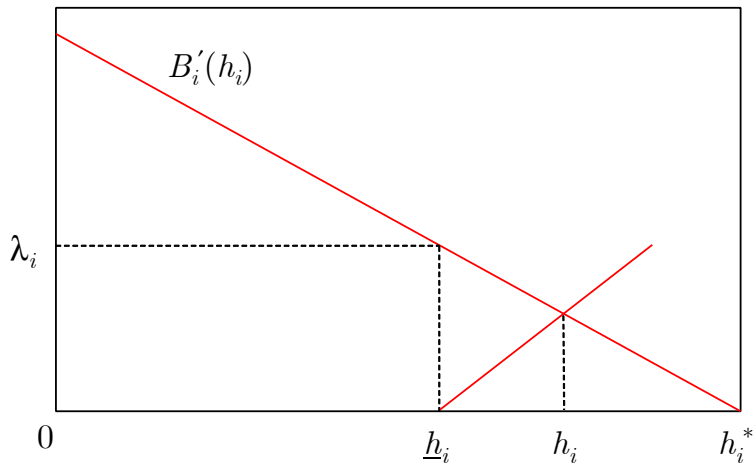

- ▶ Harvest rates exceed reported/target levels...
- ▶ Depends upon point of control, e.g., point of sale/landing
 - ▶ total harvest = reported landings + unreported landings + discards
- ▶ Implications for biological and economic models...
 - ▶ catch-effort relationships distorted
 - ▶ economic performance *underestimated*
- ▶ Link between non-compliance and overcapacity
- ▶ Response to management changes?

A microeconomic model of non-compliance

A microeconomic model of non-compliance

A microeconomic model of non-compliance

Incentives for non-compliance

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs
 - ▶ marginal or total analysis?

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs
 - ▶ marginal or total analysis?
- ▶ Non-monetary influences (+/-)

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs
 - ▶ marginal or total analysis?
- ▶ Non-monetary influences (+/-)
 - ▶ moral/social norms

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs
 - ▶ marginal or total analysis?
- ▶ Non-monetary influences (+/-)
 - ▶ moral/social norms
 - ▶ “legitimacy”

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs
 - ▶ marginal or total analysis?
- ▶ Non-monetary influences (+/-)
 - ▶ moral/social norms
 - ▶ “legitimacy”
 - ▶ social pressure

Incentives for non-compliance

- ▶ (Expected) monetary benefits vs. (expected) monetary costs
 - ▶ marginal or total analysis?
- ▶ Non-monetary influences (+/-)
 - ▶ moral/social norms
 - ▶ “legitimacy”
 - ▶ social pressure
 - ▶ other?

Modelling issues

Modelling issues

- ▶ What do we want to do?

Modelling issues

- ▶ What do we want to do?
 - ▶ explain/predict non-compliance rates?

Modelling issues

- ▶ What do we want to do?
 - ▶ explain/predict non-compliance rates?
 - ▶ build in assumptions about non-compliance?

Modelling issues

- ▶ What do we want to do?
 - ▶ explain/predict non-compliance rates?
 - ▶ build in assumptions about non-compliance?
- ▶ Analytical/empirical models?

Modelling issues

- ▶ What do we want to do?
 - ▶ explain/predict non-compliance rates?
 - ▶ build in assumptions about non-compliance?
- ▶ Analytical/empirical models?
- ▶ Analytical models

Modelling issues

- ▶ What do we want to do?
 - ▶ explain/predict non-compliance rates?
 - ▶ build in assumptions about non-compliance?
- ▶ Analytical/empirical models?
- ▶ Analytical models
 - ▶ choice of theory/model

Modelling issues

- ▶ What do we want to do?
